

PASCO *exposed*

Surface washed with marble chips exposed

The production of PASCO *exposed* Paving blocks is done in fully automatic plant which guarantees even appearance throughout the full delivery. Additional orders at a later stage will be done with the same surface. With PASCO *exposed*

the customer receives a long lasting beautiful coloured product. PASCO *exposed* surfaces can be applied to most of the many shapes and designs PASCO produces, e.g. La Plaza, Marbella, Nizza circle, Trento, La Palma etc.

A special effect can be achieved by mixing standard PASCO products with PASCO *exposed* products. Please note PASCO *exposed* Paving blocks are available in 8 cm thickness only.

PASCO *exposed* surfaces are made with marble chips from Carara (Italy). These marble chips are of excellent quality, superb brightness and colours, which will be stable even under severe sunshine
